	#	Description
FEATURE REQUESTS	F101	Developing an API to be available for our partners as well as internally for reading and writing information to RSR
	F102	Moving Akvo into a Partner Site structure
	F103	Release an Android App to integrate with Akvo RSR and provide updates
	F104	Moving our servers to a new more stable and sustainable environment
	F105	Provide end-to-end navigation to organisations and projects by linking OpenAid and RSR and converting RSR data to nIATI Compatible format
	F106	Having the full Akvo RSR site available in Multiple Languages
	F107	Having the full Akvo RSR site available in Multiple Languages
	F108	Tracking of visitors to all areas of Akvo RSR (Core existing, replace with alternative)
	F109	Resolve Meta-Tags in RSR to allow relevant information to be shown when linking using Social Media sites such as Facebook
	F110	Adding buttons to enable sharing on Social Networks via a button on site. Need to research applicable methods to implement
	F111	Customisable instant notification system for transmitting information about relevant activity within Akvo RSR to relevant stakeholders, including Email Notifications and Mailings
	F112	Develop features that allow partners to obtain information directly from the Akvo RSR system, including: activity reports, budget totals, updates and project & campaign progress
	F113	Improve the Map functionality within Akvo RSR to introduce more intelligent filtering and display methods, including grouping and filtering based on attributes in addition to geospatial information
	F115	Introduce features providing pre-formatted custom updates to projects. This will allow more detailed and structured information to be collected from the field at defined points in the project's lifecycle
	F116	Adding full audit trails and version history to objects in RSR to improve the editing options without reducing transparency
	F117	Rework of the permissions in RSR to encompass changes in Projects, Organisations and Users
	F118	Improving the new user process to streamline the authorisation and notifications delivered and required
	F119	Introduce changes to the current Akvo RSR Administration Interface to make it even easier and intuitive to use
	F120	Integrating the Akvopedia and RSR products to talk to each other in an intelligent way
UPDATES	F98	Integrating the FLOW and RSR products to talk to each other in an intelligent way. Step 1: Visualisation of FLOW data on RSR projects
	F99	Introducing and Improving the My Akvo section in RSR and providing some Social Network Functionality
	U26	Improving on work previously carried out to visualise locations on maps more effectively
	U27	Moving the publishing status inline reducing maintenance overhead
	U28	Changes to the View More functionality on Project pages to align functionality with expectations
	U29	Adding a WYSIWYG editor to the current Markdown supported form allowing prtners to create and style their content directly in theline without technical know-how
	U30	Converting the current RSS Feeds to Partner Site feeds to direct visitors to the correct destination
	U31	Some minor hosting and DNS changes are required to a set of websites supported by Akvo
	U32	Introducing more search features into the Akvo RSR Admin experience
	U33	Swapping the current Oembed software with Embed.ly which will iomprove performance and compatibility for embedding videos
BUG FIXES	U34	Modifying the Project Listing page so that when a project is linked to many partners a subset of organsiations is displayed with a link to see them all
	U35	Looking at the commenting available on Projects and Updates and aligning this with user expectations and requirements
	B87	Analysing the use of Short and Https links in YouTube videos to enable or restrict with correct validation and notification
	B88	Modification to the funding process to ensure that partners can fund projects to 100% regardless of any transaction fees
	B89	Removing the duplicates currently present in the Partner List on Project Pages in Akvo RSR
	B90	Populating the Partner Column in the Project List Widget which currently is empty
	B91	Enhancing the functionality to deal better with Images in Portrait format so they display well in Akvo RSR
	B92	Shoring up the project filtering on Partner Sites to ensure only the correct projects can be viewed
	B93	Implementing the Partners Page on Partner Sites which currently does not exist
